DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of group II, claims 9-26 in the reply filed on 05/24/2005 is acknowledged. The traversal is on the ground(s) that the searches for group I and II would be coextensive. This is not found persuasive because the method claims of group I, claims 1-8 would be classified in a different class than claims 9-26.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 9-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Howard et al. (5,439,760).

Regarding claim 9, Howard et al. disclose an electrochemical cell (figures 8-18) comprising:

- one or more electrodes (1 and 50);
- one or more tabs (20, 22) connected to the one or more electrodes (figure 14); and
- a pouch of separator (25) material enclosing the electrode assembly;

Art Unit: 2831

 wherein the one or more electrode tabs projects from the pouch of separator material (figure 14).

Regarding claim 10, Howard et al. disclose the one or more electrodes comprise one or more cathodes or anodes (figure 15).

Regarding claim 11, Howard et al. disclose the pouch of separator material comprises one or more layers of Kraft paper (column 5, lines 42-43).

Regarding claims 12-13, Howard et al. disclose the pouch of separator material comprises polyethyelene, polypropylene (column 5, lines 40-42).

Regarding claim 14, Howard et al. further comprising an adhesive (55) connecting the pouch of separator material and the electrode assembly (figure 9).

Regarding claim 15, Howard et al. disclose the electrodes are configured as a flat electrolytic capacitor cell (figure 15).

Regarding claim 16, Howard et al. disclose the electrodes are configured for use in a coiled capacitor cell (figures 17).

Allowable Subject Matter

4. Claims 17-26 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claim 17, the prior art alone or in combination does not teach the limitation of a substantially flat electrode assembly suitable for use in a capacitor cell comprising: at least one flat cathode layer having no holes for registration disposed therethrough, the cathode layer being formed of cathode foil and having a first perimeter

Application/Control Number: 10/618,048

Art Unit: 2831

of a first overall length, the cathode layer having at least a first tab projecting from the first perimeter at a first predetermined perimeter location, and at least one anode member devoid of registration or alignment apertures disposed therethrough.

Claims 18-26 variously depend from claim 17, they are allowed for the same reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
